- Ward Management
- Blood Bank Management
- Sterile Storage Management
- Internal Audit
- User Manual
- Any other customizable modules

LIS

Integrated laboratory information system (LIS) is interfaced with all auto/semi auto analyzer machines by unidirectional & bidirectional connection that records, manages, and stores data/results tracking bar-coded specimen of Anatomic Pathology, Clinical Pathology, Document Imaging & Outreach Module with security and prepares all pathological reports.
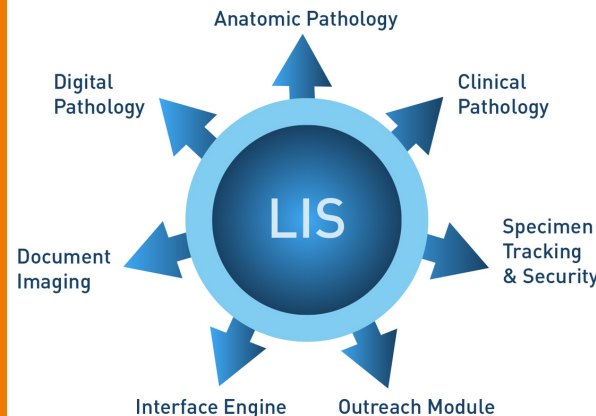

PACS

Integrated Picture Archiving & Communication system (PACS) is a medical imaging technology which provides economical storage and convenient access to images from multiple modalities. Electronic images and reports are transmitted digitally via PACS; this eliminates the need to manually file, retrieve, or transport film jackets, the folders used to store and protect X-ray film.
